

A Message From the Center Director

Lesbian, Gay, Bisexual, and Transgender (LGBT) Pride Month

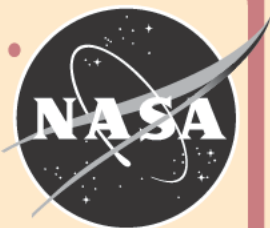

June is the observance month for LGBT Pride. During this time we recognize the contributions of our Kennedy Space Center (KSC) LGBT employees and the important role they play in contributing to the NASA mission. Excellence is achieved when we value and leverage the unique abilities and experiences of every KSC employee.

Presidential Executive Order 13672 prohibits discrimination against Federal and contractor employees on the basis of sexual orientation or gender identity. The need for authentic respect for others and earnest effort in appreciating diversity is made even more evident here in Central Florida by the recent observances for the anniversary of the Pulse terror attack in Orlando on June 12, 2016.

Discrimination, hate, and divisiveness have no place in civilized society and will not be tolerated in our workplace. To the contrary, the vitality of our workplace and our NASA team depends on inclusiveness, as well as everyone's understanding, goodwill, and harmony. I urge that we, as essential members of our KSC team, think of ourselves as a family, and I charge each of you to recognize our diversity as a valued strength, just as I do.
